PRECISION MACHINING MANUFACTURING

We are a precision tooling company in Busano near Turin covering our 3000 m² (32.300 sq ft) site of which 1500 m² (16.150 sq ft) inside our modern factory.

We specialize in **CNC machining** for parts in small and medium sized batches with an excellent track of quality benchmarks and delivery time.

During the years we developed our **quality management system** following the best practices of the UNI EN ISO 9001:2008 standards, which we obtained through the TÜV certification agency.

Our strengths have always been our **high-quality machining**, our attentive customer care to guarantee the **full satisfaction of our customers**, together with our constant **innovation efforts**.

We allocate a significant percentage of our revenues in **investment** to renew our tools and machines to keep them efficient and up-to-date with the technological development.

OUR PRECISION MACHINING

We manufacture precision machined components, usually as subcontractor, in the industrial components sector and we are experienced in machining our customers' components, who produce parts and machinery for the following sectors: Automotive, earth-moving machinery, motorcycles and scooters, cars and trucks, chemical sector, oil sector, textile, manufacturing sector, etc.

SEMI-MANUFACTURED PRODUCTS: rough bevel crown, pinions, planet gears and tumbler gears, gears, mechanical arms, bearing parts, shafts, handles and spherical rod ends, ball studs.

PROCESSED PRODUCTS: flanges and hubs, pulley wheels, cylinder bottom plates, spacer rings.

We usually machine the following materials: steel, cast iron, aluminium, polymers, teflon,

We turn all components till a 600 mm diameter and 600 mm as max length as for your requirements and drawings.
